

Now that spring has sprung, you may be considering purchasing a new shed or replacing an existing one on your property. Before doing so, please contact our Zoning and Planning Department to discuss zoning compliance and if a building permit will be required. We are also available to come out to your property to help determine the acceptable size of the shed and where it can be placed before the purchase of one. Sheds fall under our Accessory Buildings and Structures Ordinance, and there are size and setback rules that need to be followed to avoid fines and penalties.
